Shopify Product Tagging & Category Management Guide

Purpose of this Guide: To make each section of your store show only its specific products, simply add the corresponding **Tag** to your product in Shopify Admin. The theme automatically maps tags to their respective navigation links, category story circles, and builder steps.

Storefront Section	Primary Tag to Add	Accepted Synonyms	Example Items
Executive Combos	`executive-combos`	executive, combos, luxury	Executive hampers, wine & cheese sets, VIP crates
Employee Onboarding	`employee-onboarding`	onboarding, welcome, welcome-kit	Welcome kits, employee swag, starter sets
Drinkware & Bottles	`drinkware`	bottle, bottles, flask, tumbler, mug	Temperature flasks, insulated bottles, tumblers
Diaries & Stationary	`diaries`	diary, journal, notebook, stationery, pen	Leather journals, executive diaries, pens
Apparel & Bags	`apparel`	apparel-bags, tshirt, hoodie, backpack	Polo t-shirts, branded hoodies, laptop bags
Diwali & Festive	`festive`	diwali, diwali-festive, holiday	Dry fruit boxes, brass diyas, celebration crates
Tech & Smart Gadgets	`tech`	tech-audio, gadgets, powerbank	Bluetooth speakers, wireless chargers, powerbanks
Artisan Chocolates & Tea	`gourmet`	chocolates, treats, tea	Handcrafted Belgian chocolates, artisan coffees
Eco & Wellness	`eco`	wellness, plants, bamboo	Air-purifying desk plants, bamboo sets, candles
Custom Box: Packaging (Step 1)	`custom:packaging`	packaging	Rigid magnetic gift boxes, wooden crates
Custom Box: Goodies (Step 2)	`custom:box_item`	box_item, goodie	Individual items available to put in box

How to Add Product Tags in Shopify Admin (5 Quick Steps)

Step 1	Log in to your **Shopify Admin** panel (e.g. https://admin.shopify.com).
Step 2	In the left navigation menu, click **Products** → **All products**, then click the product you wish to organize (or click **Add product**).
Step 3	On the right-hand sidebar, scroll down to the **Product organization** card and locate the **Tags** field.
Step 4	Type the exact tag (for example: **drinkware**) and press **Enter** on your keyboard so it appears as a tag pill.
Step 5	Click **Save** at the top-right corner of the page. The product will immediately appear in that specific category on the storefront!

Pro Tips & Best Practices for Product Organization

• **Multiple Tags on One Product:** A single product can have multiple tags! For example, a temperature-sensing bottle can have both **drinkware** (so it displays in the Drinkware section) and **custom:box_item** (so customers can also choose it in the Custom Box Builder).

• **Custom Box Builder Tags:**
- Tag boxes with **custom:packaging** so they appear in Step 1.
- Tag goodies with **custom:box_item** so they appear in Step 2 with quantity selector pills.

• **Case-Insensitive Matching:** The theme is designed to be forgiving: tags like drinkware, Drinkware, or DRINKWARE all match seamlessly.

• **Instant Real-Time Updates:** Once you add a tag and save in Shopify Admin, the storefront immediately reflects the change without any code editing.
